### President/CEO; Ed Jaunzemis

We are thrilled to announce that the moment is here! ...Moderustic Inc is continuing our Patent Portfolio. In what has been a very long road, filled with financial excess and extensive legal delays, we are now in the process of receiving our notice of our finalization of allowability. We will soon begin moving forward in serving alleged infringers; Fire Glass was invented in 2003, and patents pending's were published in 2005 and 2006. ## FIRE GLASS ECO-FRIENDLY

*What warms the hearth may not always be good for the environment...According to the United States Environmental Protection Agency, the average emissions of fine particles in the air from a wood-burning Fire Place can cause negative effects in the oxygen we breathe. Some communities are now restricting or banning wood burning applications for this reason alone. Moderustic Inc developed the concept of an eco-friendly alternative to Wood Burning Fireplaces. One of the most striking alternatives to a Wood Burning Fireplace, is using colored tempered glass pieces chosen to fit your décor. For more information Contact Moderustic Inc at our Corporate Office/Showroom at 909-989-6129 Monday – Saturday 9am till 6pm or contact us on our web site on [www.Moderustic.com](http://www.Moderustic.com)*
