FIREGLASS: Tumbled, safe to the touch, crushed tempered glass - a simple idea (Patent #7,976,360 B2) that caught fire and spread across the globe. Beautiful, clean burning and radiates more heat than fake logs. We offer the largest collection of colors and sizes! [\$4.15 - \$6.60 per lb on the average]

TOPPERS & TOPPINGS: We offer a vast collection of crystals ranging in color, texture and size. *Toppers*, are typical larger pieces; while *Toppings* offer smaller granulated crystals. These are not a substitute to fireglass, but rather accent pieces to sprinkle over your base glass. [\$13 - And Up Per lb]

HOW MUCH DO YOU NEED?

To determine how much base glass you need for your fireplace you will need 3 measurements. The back width, the front width and depth from front to back.

Once you have those measurements plug in your numbers here:
Moderustic.com/How-Much-Do-I-Need.html
Average Order Cost \$200-\$400

Remember with fireglass there are no cinders, embers, odors and its clean-burning!

PORTABLE RV FIRE PIT

No Odor! No Smoke! No Ashes! No Pollution! No Mess! Our outdoor fire-pits are ideal for campgrounds since they are not considered an 'open fire' but rather a 'recreational fire'.

Able to be turned ON or OFF, they abide by the same guidelines that apply to barbeques. Clean burning, easy to transport and uniquely beautiful with our patented-process fireglass. Available in either Propane or Natural gas.

Available Metal Types:

Steel – Ideal for dry climates

Aluminum – General outdoor use

Stainless Steel – Ideal for wet climates

Available Sizes and Glass Amounts:

14" square requires 14 lbs of glass to fill

16" square requires 17.5 lbs of glass to fill

18" square requires 21 lbs of glass to fill

24" square requires 38.5 lbs of glass to fill

Or You May Use Black Crushed Lava Rock as Filler:

14" square uses \$6.50 worth of Crushed Lava

16" square uses \$10.00 worth of Crushed Lava

18" square uses \$13.50 worth of Crushed Lava

24" square uses \$31.00 worth of Crushed Lava

VORTEX FIRES

The Vortex Fires differ, in that, they are hard-lined into their fuel source and are not traditionally portable. However, the principal is the same, they are naturally aspirated without the use of any electronics. Manufactured for both indoor and outdoor use. **However, if you plan to use them indoors you must make sure to comply with local building codes.**

All our Vortex Fires are built to order and can be modified to fit your design needs. Construction time ranges from 5 to 8 weeks depending on our workload.

Metal Options:

Steel, Aluminum, Stainless Steel (extra charges applicable), Copper or Brass clad (extra charges applicable)

Gas Option:

Propane or Natural gas.

Average Sizes:

36" to 48" high

HIGH FIRE PORCELAIN COATED FIREBALLS: Our popular fireballs will give your fire area greater style and aesthetic beauty. The porcelain finish allows you to wipe off the soot, unlike fireballs from the past. [\$6.75 - \$54.00]
