

HOW TO CLEAN YOUR FIREPLACE

If it is needed at all

- 1. A chimney sweep may need to come out and clean the chimney, but not necessary-check up inside with a light and/or a mirror to see if it is dirty**
- 2. Clean the inside walls with a wire brush and use a vacuum cleaner after (to get what you just cleaned off)
Be sure to wear a dust mask of sorts**
- 3. Use a DRY cloth to wipe off any debris/ and/or vacuum again**
- 4. Never use anything wet to clean your fireplace EVER!**
- 5. Now you are ready to paint. This is where the fun begins!
Please see our How to paint sheet.**
