# Portable Fire Pits

## Propane OR Natural Gas

*No Odor! No Smoke! No Ashes! No Pollution! No Mess!* Our outdoor fire-pits are ideal for campgrounds since they are not a considered an 'open fire' but rather a 'recreational fire'. Able to be turned ON or OFF, *they abide by the same guidelines that apply to barbeques.* Clean burning, easy to transport and uniquely beautiful with our patented-process fireglass.

Steel Fire Pits will RUST if left unprotected in cold / wet environments. Steel fire pits are ideally suited for dry climates. You can choose to have your fire pit painted; we have 25 colors to choose from. Please inquire about our color sheet.
