PORTABLE & RV FIRE PIT

No Odor! No Smoke! No Ashes! No Pollution! No Mess! Our outdoor fire-pits are ideal for campgrounds, since they are not considered an 'open fire' but rather a 'recreational fire'.

Able to be turned ON or OFF, they abide by the same guidelines that apply to barbeques. Clean burning, easy to transport and uniquely beautiful with our patented-process fireglass. Available in either Propane or Natural gas.

Available Metal Types:

Steel – Ideal for dry climates

Aluminum – General outdoor use

Stainless Steel – Ideal for wet climates

Custom Fireplace Surrounds

VORTEX FIRES

The Vortex Fires differ, in that, they are hard-lined into their fuel source and are not traditionally portable. However, the principal is the same, they are naturally aspirated without the use of any electronics. Manufactured for both indoor and outdoor use. **However, if you plan to use them indoors you must make sure to comply with local building codes.**

All our Vortex Fires are built to order and can be modified to fit your design needs. Construction time ranges from 5 to 8 weeks depending on our workload.

Metal Options:
Steel, Aluminum, Stainless Steel, Copper or Brass cladded,(extra charges applicable),
Fuel Option:
Propane or Natural gas.

Average Sizes: 36” to 48” Tall
